

This matter will effect K-LOVE station 94.3 in the Chicagoland area and my local community. If it is replaced by another type of station in an LPFM format it will have a big effect on thousands of listeners in this area that do not have any other choices for this type of programming. The programming of K-LOVE is incredibly important to the public interest because of this and because it provides safe music for adults and kids and a great alternative to the hostile music found on most other stations. This type of programming is very important to the moral backbone of the community and stresses love, honesty, and most importantly the Gospel of our Lord and Savior, Jesus. Please keep K-LOVE on the air here and across the nation where it is so much needed. Thank you,

Jim
